Strings and Regular Expressions in JavaScript

Version Check

Version Check

This course was created by using:

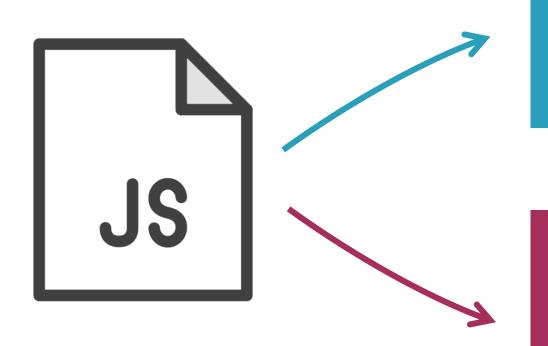

- ECMAScript 2022

Version Check

This course is 100% applicable to:

- ECMAScript 2022

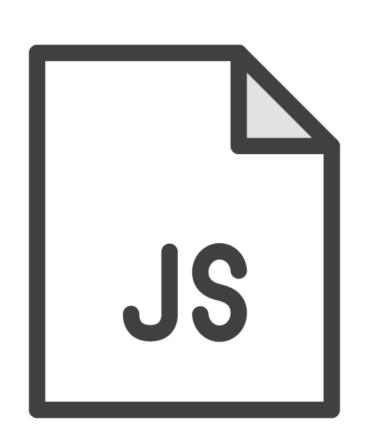

V8

SpiderMonkey (5)

New Relevant Features

- BigInt
- .at()
- "d" flag

Prerequisites

General programming concepts

- Data types
- Functions or methods
- Statements (if-else, loops, etc.)

HTML basics

Code Editor

Setup

OS: Windows

IDE: VS Code

Node.js

Table of contents Description Transcript Exercise files

Course Overview

Defining and creating strings

- App: currency converter

String methods

- Library of utility methods

Regular Expressions

App: basic spell checker

Just choose a style and use it consistently

```
login: "js_lord",
id: 123
login: 'js_lord',
id: 123
```

Rules

ESLint SonarSource

String Interpolation

```
"The rate is " + 0.9;
const rate = 0.9;
`The rate is ${rate}`;
```

Best Practices

```
// avoid
"The rate is ${rate}";
```

"Dear \${user}, thank you for choosing

\${company} to..."

Best Practices

```
// don't put everything in a single template
`We ... ${expression? `${a}` : b}... text`;
```

```
const rate = 0.9;
String.raw`Our rate is \t \n ${rate}`;
// Output: Our rate is \t \n 0.9;
```

Use Cases

Tutorials and documentation

Print windows directory locations

- C:\Users\

Unicode

Character/ Grapheme	Code Point	UTF-16	16-bit units
A	65	U+0041	
[]	[]	[]	
Z	122	U+007A	
[]	[]	[]	
55	128184	0xD83D, 0xDCB8	

How to remove emojis?

Use .replace(regex)

Use a library

An emoji exists?

It doesn't mean it will be supported everywhere.

(test accordingly)

Summary

Single or double quotes. Be consistent.

Use template literals

Be careful with special characters

String.raw`template \${literals}`

Emojis - use a library and test thoroughly

Avoid new String("s")
